Amendments to the Claims

- 1. (Previously presented) A process for producing dry β -conglycinin protein which comprises heating a solution or paste containing 5 to 20% of β -conglycinin protein whose β -conglycinin content is 40% by weight or more in the protein at higher than 75°C but lower than 160°C under acidic conditions of pH 3.5 to 6.0, and then drying the solution or paste.
- 2. (Previously presented) The process according to claim 1, wherein the acidic conditions are those at pH 4.0 to 5.6.
 - 3-9. (Cancelled)
- 10. (Previously presented) The process according to claim 1, wherein the drying is carried out after neutralization and sterilization.
